Fund Description

Aeon Investment Management's equity investment style is Growth At a Reasonable Price (GARP). Our adaptation of the GARP style seeks to combine the best of growth and value investing, by buying companies with long term sustainable growth rates in earnings per share greater than that implied by the company's market valuation.

Fund Objectives

The Aeon Active Equity Prescient Fund seeks to achieve:

- Invest in high quality businesses at attractive prices that are positioned for long term growth.
- Outperform the client's equity benchmark over different investment cycles.
- Consistently apply our implied growth methodology.
- Manage risk through disciplined portfolio construction.
- Employ low cost trading techniques.

Fund Managers

Asief Mohamed
Chief Investment Officer
B.Com. CA(SA), CFA

Jay Vomacka
Portfolio Manager
CFA, MSc(Eng)(Ind)(Elec), CFTe

Fund Information

Benchmark: Capped SWIX (J433T)
Inception date: 21 January 2019
Fund size: R 209.87 million
Investment horizon: Five years plus
Classification: South African - Equity - General
Asset Allocation: 91.4% Equities; 8.6% Cash

Risk Profile

Conservative Moderate Aggressive

- Generally these portfolios hold more equity exposure than any other risk profiled portfolios therefore tend to carry higher volatility.
- Expected potential long term returns could be higher than other risk profiles, in turn potential losses of capital could be higher.

Fees & Charges

Retail (Minimum lumpsum R10 000 or Debit Order R500):

Fund Performance Review & Market Commentary

The Aeon Active Equity Prescient Fund (CIS) outperformed its benchmark by 88 bps on a net return basis for the month of March 2019.

An overweight position in British American Tobacco and an underweight position in ABSA were the main positive contributors to return for the month. Overweight positions in Discovery and Aspen Pharmacare were the main detractors. The benchmark equity index was down 0.18% for the month of March 2019.

The strongest sector for the quarter ended March was Resources as markets rallied from US-China trade talks, and positive global trade data which benefited resource stocks led by BHP, Anglo American and Sasol. General Retailers was the weakest sector for the quarter, led by MRP, Woolworths, and Truworths due to weak trading over the festive period, and a tough South African consumer environment.

Globally, a low interest rate environment has continued to drive markets. Geopolitical and systematic risk has weighed on investor sentiment; however, some certainty and stability has begun to take shape. Three major economic issues being the US-China trade war, Brexit, and the Fed policy dominated the headlines. Global equities rallied as prospects of an amicable resolution of the US-China trade conflict remain high. Chinese PMI data was above consensus estimates, and the US showed strong job growth numbers. Aided by positive economic data, Fed chair Jerome Powell announced that the Fed would keep rates fixed at the 2.25%-2.50% range for now, inflation was near the 2% target, and he generally delivered an 'upbeat' statement. Expectations of a Fed increase for the year are now practically zero, quite different from their previous position. Importantly, a dovish stance from the Fed has been supportive for markets in the short term as this has led to further "Risk on" trading in emerging markets. In the UK, Parliament gained control of the Brexit process, however MP's are still struggling to reach consensus on a way forward with the hard Brexit day looming. Emerging market economies have been shaped by these global events and thus have benefited as a result.

Locally, political and corporate uncertainty were the two keywords on most investors' minds. Politicking is in full force with several politicians facing damning allegations. Many South African corporates have also come under severe pressure following various disappointing stock-specific announcements. At the same time, Eskom continues to hurt the SA economy, with severe load shedding once again dampening market and consumer sentiment. Rating agency Moody's kept South Africa at investment grade with a stable outlook which was widely welcomed. The run up to the national elections in May remains a key concern for rating agencies as well as investment sentiment. This coupled with South Africa's lack of fiscal options may weigh on investment in the short term.

Naspers announced its intention to float a new company housing Naspers international asset on the Euronext in the Netherlands. This is widely positive and will positively bring some progress in reducing the discount to underlying investments and seek to reduce concentration risk on underlying indexes. At Aeon Investment Management, we believe the underlying concentration risk is essentially the same as both companies would essentially house the same assets (except for Media 24 and Takealot which will be held in the local counter only). However, given that many funds are limited to holding a maximum percentage holding in a single stock, as well as arbitrage opportunities for international investors, we view the proactive action by Naspers as positive as the potential for increased pool of buyers is now a real possibility.

Looking forward, the optimistic growth expectations set for the local economy seem to be disappointing with hope residing more on global growth. However, green shoots of opportunity are starting to appear being higher commodity prices which bode well for the local economy. Globally, inflation and GDP numbers will be key to try gauge the timing and level of tighter monetary policies. We have seen pockets of opportunity begin to surface and will monitor these closely. Astute stock picking that delivers superior value through the cycle and companies whose cash flows support earnings tend to outperform the market.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.

For any additional information such as fund prices, brochures and application forms please go to www.aeonim.co.za

Glossary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

cpu: cents per unit.

Alpha: Denoted the outperformance of the fund over the benchmark.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

Max Gain: Largest increase in any single month

% Positive Month: The percentage of months since inception where the Fund has delivered positive return.

Dividend Yield: The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.

PE Ratio: The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.

High Water Mark: The highest level of performance achieved over a specified period.
