Investment Philosophy

Aeon Investment Management's equity investment style is Growth At a Reasonable Price (GARP). Our adaptation of the GARP style seeks to combine the best of growth and value investing, by buying companies with long term sustainable growth rates in earnings per share greater than that implied by the company's market valuation.

Fund Objectives

The Aeon Active Equity Fund seeks to achieve:

- Invest in high quality businesses at attractive prices that are positioned for long term growth.
- Outperform the client's equity benchmark over different investment cycles.
- Consistently apply our implied growth methodology.
- Manage risk through disciplined portfolio construction.
- Employ low cost trading techniques.

Fund Performance Review & Market Commentary

The Aeon Active Equity Fund outperformed its benchmark by 117 bps for the first quarter of 2019 and is outperforming its benchmark by 162 bps over a three-year period.

Overweight positions in British American Tobacco and Impala Platinum were the main positive contributors to return for the quarter. An underweight position in Anglo American and an overweight position in Discovery were the main detractors. The benchmark equity index was up 6.01% for the first quarter of 2019.

The strongest sector for the quarter ended March was Resources as markets rallied from US-China trade talks, and positive global trade data which benefited resource stocks led by BHP, Anglo American and Sasol. General Retailers was the weakest sector for the quarter, led by MRP, Woolworths, and Truworths due to weak trading over the festive period, and a tough South African consumer environment.

Globally, a low interest rate environment has continued to drive markets. Geopolitical and systematic risk has weighed on investor sentiment; however, some certainty and stability has begun to take shape. Three major economic issues being the US-China trade war, Brexit, and the Fed policy dominated the headlines. Global equities rallied as prospects of an amicable resolution of the US-China trade conflict remain high. Chinese PMI data was above consensus estimates, and the US showed strong job growth numbers. Aided by positive economic data, Fed chair Jerome Powell announced that the Fed would keep rates fixed at the 2.25%-2.50% range for now, inflation was near the 2% target, and he generally delivered an 'upbeat' statement. Expectations of a Fed increase for the year are now practically zero, quite different from their previous position. Importantly, a dovish stance from the Fed has been supportive for markets in the short term as this has led to further "Risk on" trading in emerging markets. In the UK, Parliament gained control of the Brexit process, however MP's are still struggling to reach consensus on a way forward with the hard Brexit day looming. Emerging market economies have been shaped by these global events and thus have benefited as a result.

Locally, political and corporate uncertainty were the two keywords on most investors' minds. Politicking is in full force with several politicians facing damning allegations. Many South African corporates have also come under severe pressure following various disappointing stock-specific announcements. At the same time, Eskom continues to hurt the SA economy, with severe load shedding once again dampening market and consumer sentiment. Rating agency Moody's kept South Africa at investment grade with a stable outlook which was widely welcomed. The run up to the national elections in May remains a key concern for rating agencies as well as investment sentiment. This coupled with South Africa's lack of fiscal options may weigh on investment in the short term.

Naspers announced its intention to float a new company housing Naspers international asset on the Euronext in the Netherlands. This is widely positive and will positively bring some progress in reducing the discount to underlying investments and seek to reduce concentration risk on underlying indexes. At Aeon Investment Management, we believe the underlying concentration risk is essentially the same as both companies would essentially house the same assets (except for Media 24 and Takealot which will be held in the local counter only). However, given that many funds are limited to holding a maximum percentage holding in a single stock, as well as arbitrage opportunities for international investors, we view the proactive action by Naspers as positive as the potential for increased pool of buyers is now a real possibility.

Looking forward, the optimistic growth expectations set for the local economy seem to be disappointing with hope residing more on global growth. However, green shoots of opportunity are starting to appear being higher commodity prices which bode well for the local economy. Globally, inflation and GDP numbers will be key to try gauge the timing and level of tighter monetary policies. We have seen pockets of opportunity begin to surface and will monitor these closely. Astute stock picking that delivers superior value through the cycle and companies whose cash flows support earnings tend to outperform the market.
