Fund Holdings (as at 30 June 2020)

Asset Allocation

Sector Allocation (as a % of Equities)

Top Ten Holdings (as a % of Equities)

Investment Philosophy

Aeon Investment Management's equity investment style is Growth At a Reasonable Price (GARP) and modelling Implied vs. Sustainable Growth. We also utilise our in-house Currency Model for foreign asset allocation and the Fear & Greed Index for appropriate protective structure overlays. Aeon Balanced Prescient Fund's investment strategy encompasses active asset allocation and active management of underlying equity and fixed income assets. The fund has five diversified sources of alpha (GARP Active Equity, Smart Multi-Factor Equity, GARP Foreign Equity, Diversified Income, Derivative Protective Overlay).

Fund Objectives

The Aeon Balanced Prescient Fund seeks to achieve:

- Return target of CPI +5%
- Inflation-beating returns by investing in the full spectrum of domestic and foreign equity and fixed income markets
- Provide investors with stable income and modest capital appreciation in the long run
- Manage risk through disciplined portfolio construction
- Employ low cost trading techniques

Fund Managers

Portfolio Manager & Analyst

Fund Information

Benchmark: CPI
Inception date: 1 November 2012
Fund size: R 104.94 million
Investment horizon: Five years plus
Classification: South African - Multi Asset - Medium Equity
Regulation 28 compliant: Yes

Risk Profile

- These portfolios generally hold more equity exposure than low risk portfolios but less than high risk portfolios.
- In turn the expected volatility is higher than low risk portfolios, but less than high risk portfolios.
- The probability of losses are higher than that of the low risk portfolios, but less than high risk portfolio.
- Expected potential long term investment returns could therefore be lower than high risk portfolios due to lower equity exposure, but higher than low risk portfolios.

Fees & Charges

Retail (Minimum R50 000):
Flat Fee: 0.50% p.a. plus VAT.
Total Expense Ratio (TER) & Transaction Costs (31-Mar-2020):
 TER - Retail: 0.77%

Fund Class	Retail (%)
Management Fee	0.50
Performance Fee	-
Other Fees*	0.27
Total Expense Ratio (TER)	0.77
Transaction Costs (TC)	0.15
Total Investment Charge (TIC)	0.92

Income distribution: Annually (March)
 2020 cpu of 5.80 (retail)

Administration

Fund auditor: Ernst & Young Incorporated
Fund trustees & custodian: Nedbank Investor Services
Fund administration: Prescient Fund Services (Pty) Ltd.

Fund Performance Review & Market Commentary

The Aeon Balanced Prescient Fund was up by 16.16% on a net return basis for the second quarter of 2020 and is up by 6.55% over a one-year period.

The quarter ended June saw a strong rebound in global financial markets due to the easing of global lockdown restrictions across countries. The easing of business conditions combined with governmental fiscal support measures and interventions, in response to the Covid-19 pandemic, were received positively by investors. There is also hope of a vaccine being developed with many companies moving to further stages of trials improving sentiment. However, many companies have halted or even cut operations because of this pandemic which has led to large job losses. Financial market conditions have vastly differed from 'real' market and economic conditions due to the forward-looking nature of financial markets and improved expectations regarding the future. The situation remains fluid. The sector that fared best for the quarter ended June was Healthcare led by pharmaceuticals Aspen and Adcock Ingram. Investors rushed into healthcare due to widespread demand created because of the pandemic, as well as anti-inflammatory drug Dexamethasone which is being used to treat patients for Covid-19. Banks was the weakest sector for the quarter, led by First Rand, Investec, and Capitec as banks start to provide for increasing bad debts due to worsening financial conditions for credit consumers.

Globally, central banks have continued to be accommodative as a reactionary measure to tackle the pandemic. This implies strong government fiscal relief responses by numerous countries to attempt to safeguard and stimulate their economies. An already low interest rate environment has left authorities with limited intervention capabilities. Compounding the problem is business uncertainty; poor forecast visibility; and the lack of cash liquidity. The IMF released its new economic growth forecasts stating that it now expects the world's GDP to decrease by 4.9% in 2020.

The Fed, in response to downgrade expectations, has kept interest rates unchanged and stated that it was unlikely to increase rates until 2022. This all results in heightened risk and hence a "risk off" approach to investing in asset classes such as emerging markets. Tensions between the US and China are also ongoing, with the new battleground for the future likely to include reserve "currency wars". This increased tension combined with prevailing world uncertainties regarding Brexit, China-India border tensions and the likely extension to Vladimir Putin's term in Russia have kept markets attentive. Investors are analysing the reopening of worldwide economies as a gauge for global growth conditions with hope of a return to some normality.

Locally, the domestic environment took cues from global markets with a stronger Rand benefitting from global Dollar weakness. Local sentiment has, however, continued to be negative as the country faces severe economic growth obstacles. The unemployment rate hit a 17 year high of 30%. It is expected to go up further as the economic effects of Covid-19 flow into the official numbers. SOE's remain a big problem for government as many require further bailouts or restructure. Finance minister Mboweni gave his special adjustment budget speech with little detail on how government intends to tackle its fiscal situation. What is becoming clearer is that taxes are expected to increase in 2021. South Africa's fiscal position remains constrained through poor policy decisions and weak implementation by government. Things may be difficult for South Africa in the years ahead with the Treasury expecting the country's GDP to contract by 7.2% this year while government debt is expected to increase to around 82% of GDP. All three rating agencies have stated that it is unlikely that the country will be able to stabilise its debt by 2023 as planned.

Looking forward, growth expectations for the local economy seem to be dependent on a strong recovery in global growth and Covid-19 containment measures. A "second wave" of infections or a severe mutation of the strain of virus could be disastrous for the world economy but all indicators are that a vaccine will likely be developed soon. Astute stock picking with our Growth at Reasonable Price (GARP) philosophy that delivers superior value through the cycle and a focus on companies whose cash flows support earnings is expected to stand us in good stead moving forward.

Glossary

Annualised performance: Annualised performance show longer term performance rescaled to a 1 year period. Annualised performance is the average return per year over the period. Actual annual figures are available to the investor on request.

Highest & Lowest return: The highest and lowest returns for any 1 year over the period since inception have been shown.

NAV: The net asset value represents the assets of a Fund less its liabilities.

cpu: cents per unit.

Alpha: Denoted the outperformance of the fund over the benchmark.

Standard Deviation: The deviation of the return stream relative to its own average.

Max Drawdown: The maximum peak to trough loss suffered by the Fund since inception.

Max Gain: Largest increase in any single month

% Positive Month: The percentage of months since inception where the Fund has delivered positive return.

Dividend Yield: The weighted average dividend yield of all the underlying equity in the Fund. The dividend yield of each company is the dividends per share divided by the price.

PE Ratio: The weighted average price earnings ratio of all the underlying equity in the Fund. The price earnings ratio of each company is the price divided by the earnings per share.

High Water Mark: The highest level of performance achieved over a specified period.

Aeon Balanced Prescient Fund

Class A2 | Minimum Disclosure Document (MDD) as at 30 June 2020

Issue date: 14 July 2020

Assets managed by: Aeon Investment Management

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information.

Below are fund specific risks:

Default risk: The risk that the issuers of fixed income instruments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The issuers credit quality is vital. The worse the credit quality, the greater the risk of default and therefore investment loss.

Derivatives risk: The use of derivatives could increase overall risk by magnifying the effect of both gains and losses in a Fund. As such, large changes in value and potentially large financial losses could result.

Developing Market (excluding SA) risk: Some of the countries invested in may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Foreign Investment risk: Foreign securities investments may be subject to risks pertaining to overseas jurisdictions and markets, including (but not limited to) local liquidity, macroeconomic, political, tax, settlement risks and currency fluctuations.

Interest rate risk: The value of fixed income investments (e.g. bonds) tends to be inversely related to interest and inflation rates. Hence their value decreases when interest rates and/or inflation rises.

Property risk: Investments in real estate securities can carry the same risks as investing directly in real estate itself. Real estate prices move in response to a variety of factors, including local, regional and national economic and political conditions, interest rates and tax considerations.

Currency exchange risk: Changes in the relative values of individual currencies may adversely affect the value of investments and any related income.

Geographic / Sector risk: For investments primarily concentrated in specific countries, geographical regions and/or industry sectors, their resulting value may decrease whilst portfolios more broadly invested might grow.

Derivative counterparty risk: A counterparty to a derivative transaction may experience a breakdown in meeting its obligations thereby leading to financial loss.

Liquidity risk: If there are insufficient buyers or sellers of particular investments, the result may lead to delays in trading and being able to make settlements, and/or large fluctuations in value. This may lead to larger financial losses than expected.

Equity investment risk: Value of equities (e.g. shares) and equity-related investments may vary according to company profits and future prospects as well as more general market factors. In the event of a company default (e.g. bankruptcy), the owners of their equity rank last in terms of any financial payment from that company.

The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 15:00 or 17:00 depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
