Fund Description

Aeon Investment Management's equity investment style is Growth At a Reasonable Price (GARP). Our adaptation of the GARP style seeks to combine the best of growth and value investing, by buying companies with long term sustainable growth rates in earnings per share greater than that implied by the company's market valuation.

Fund Objectives

The Aeon Active Equity Prescient Fund seeks to achieve:

- Invest in high quality businesses at attractive prices that are positioned for long term growth.
- Outperform the client's equity benchmark over different investment cycles.
- Consistently apply our implied growth methodology.
- Manage risk through disciplined portfolio construction.
- Employ low cost trading techniques.

The portfolio has adhered to its fund objectives.

Fund Performance Review & Market Commentary

The Aeon Active Equity Prescient Fund (CIS) underperformed its benchmark by 91 bps on a net return basis for the first quarter of 2021 and is underperforming its benchmark by 191 bps over a one-year period.

Overweight positions in Impala Platinum and BHP were the main positive contributors to return for the first quarter of 2021. An underweight position in Anglo American Platinum and an overweight position in Discovery were the main detractors. The benchmark was up 12.60% for the first quarter of 2021.

The first quarter of the new year saw global emerging equity markets strongly positive, following positive sentiment over the rollout of vaccines in multiple countries. Despite the continued increase in the number of global Covid-19 cases and the associated lockdowns, market participants are seeing through this, and are now more optimistic about the recovery of the world's economy as vaccine deployment and acceptance continues to improve. Markets were further buoyed by US President Joe Biden's \$2.25 trillion stimulus package, which was passed by members of the House of Congress. On the negative side, new 'strains' of the virus have been detected increasing potential unknowns about the virus and its effects over the months and years to come. Due to the expectation of a potential quicker than expected economic recovery, and rising inflation concerns, long-term bond yields started to move higher with 10-year yields hitting a high of 1.75%, causing investors to re-examine equity valuations. Fed chair Powell's comments to the Senate on the Fed's inflation expectations is that the relief package will not pose an inflation risk and that inflation is only expected to reach the Fed's target in about three years. The situation remains fluid and market volatility is expected to remain. The sector that fared best for the quarter ended March was General Retailers led by Woolworths, Foschini and Truworths. Banks was the weakest sector for the quarter, led by Standard Bank and Capitec.

Globally, central banks and governments have continued to be accommodative as a reactionary measure to tackle the pandemic. Treasury Secretary Yellen reiterated the importance of prioritising big stimulus action and fighting the pandemic. This is positive for business and markets. Numerous countries have shared similar sentiment to safeguard and stimulate their economies. An already low interest rate environment has left authorities with limited intervention capabilities. The Fed announced that it will be targeting average inflation of 2% going forward meaning that US interest rates could remain lower for longer. Furthermore, the US jobs report came in above expectations, while the unemployment rate decreased to 6% in March. Investors are finding this news flow positive for trade which should bode well for business and company earnings expectations in the months ahead. However, business uncertainty and poor forecast visibility will remain until vaccinations are rolled out, and sporadic lockdown restrictions have ended.

Locally, the domestic environment took cues from global markets with global Dollar weakness benefiting local industries such as Resources. Local sentiment has continued to be negative as the country faces economic growth obstacles. SA's unemployment came in above consensus forecasts at a record 32.5% in the fourth quarter of 2020. Treasury now expects debt to stabilise at 89% of GDP in the 2025/26 financial year while 2021's GDP growth is forecasted at 3.3%. Both Fitch and Moody's stated that they still think that it will be very difficult for government to meet its debt consolidation targets, especially once the risk of SOE debt is considered. South Africa's fiscal position remains constrained through poor policy decisions, and ineffective implementation by government. Financial conditions may be difficult for South Africa in the years ahead with consumer spend also muted. The pandemic remains a key focus with state funds allocated to the purchase and distribution of vaccines. This is an important task for government and all eyes will be on the implementation rollout.

Looking forward, growth expectations for the local economy seem to be dependent on a strong recovery in global growth, improving confidence, positive local government action, and Covid-19 containment measures. Astute stock picking with our Growth at Reasonable Price (GARP) philosophy that delivers superior value through the cycle and a focus on companies whose cash flows support earnings is expected to stand us in good stead moving forward.

Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend withholding tax. Full performance calculations are available from the manager on request.
