## Fund Description

Aeon Investment Management's equity investment style is Growth At a Reasonable Price (GARP). Our adaptation of the GARP style seeks to combine the best of growth and value investing, by buying companies with long term sustainable growth rates in earnings per share greater than that implied by the company's market valuation.

## Fund Objectives

The Aeon Active Equity Prescient Fund seeks to achieve:

- Invest in high quality businesses at attractive prices that are positioned for long term growth.
- Outperform the client's equity benchmark over different investment cycles.
- Consistently apply our implied growth methodology.
- Manage risk through disciplined portfolio construction.
- Employ low cost trading techniques.

The portfolio has adhered to its fund objectives.

### Investment Management

The Aeon Active Equity Prescient Fund (CIS) underperformed its benchmark by 136 bps on a net return basis for the third quarter of 2021 and is underperforming its benchmark by 964 bps over a one-year period.

An overweight position in MTN Group and an underweight position in Sibanye Stillwater were the main positive contributors to return for the third quarter of 2021. Overweight positions in Prosus and Impala Platinum were the main detractors. The benchmark equity index was up 3.19% for the third quarter of 2021.

At Aeon Investment Management we continue to make every effort to ensure client performance exceeds investor expectations, however, we anticipate a temporary drop in the rolling performance in the near term as positive alpha periods fall off the measured periods. The rolling period's fund performance is anticipated to lag the benchmark and peers in the short term.

The quarter ended September saw global equity markets mixed following the turmoil in Afghanistan, the Chinese authorities' technology sector crackdown, the continued increase in Covid-19 cases of the Delta variant, as well as fears that the Fed's tapering might come sooner than expected. We are more optimistic about the recovery of the world's economy as vaccine deployment and acceptance continues to improve. Market sentiment was boosted by Fed Chair Powell's speech at the Jackson Hole policy symposium, in which he indicated that though the Fed could start reducing its bond purchase program later this year, interest rate increases would not be imminent. The sector that fared best for the quarter ended September was Healthcare led by index heavyweight Aspen. Resources was the weakest sector for the quarter led by Impala, BHP and Sibanye as softer commodity prices weighed on the sector.

Globally, central banks and governments have continued to be accommodative as a reactionary measure to tackle the pandemic. The Fed previously announced that it will be targeting average inflation of 2% going forward meaning that US interest rates could remain lower for longer. Sentiment was buoyed when the US Senate passed the new \$1-trillion infrastructure spending bill. In China, the CCP (Chinese Communist Party) released multiple draft proposals focussed on limiting unfair competition in the technology sector. It also passed the Personal Information Protection law which imposes restrictions on how companies handle user data. Because of this, technology companies were under pressure throughout the quarter. This was reflected locally in the Naspers Prosus group. Globally, investors are finding countries' gradual re-openings positive, which should bode well for business and company earnings through the recovery process. However, business uncertainty and poor forecast visibility will remain until economies fully reopen, and sporadic lockdown restrictions have ended. Investors are also keenly monitoring a slowdown in China's economic growth rate as well as global inflation as indicators of slowing global growth into the new year.

Locally, the country is still reeling from the violent riots which resulted in the looting of many stores, destruction of properties and the death of over 350 people. The army had to be deployed to assist the police in restoring stability. Local sentiment has continued to be negative as the country faces economic growth obstacles. South Africa's fiscal position remains constrained through poor policy decisions, and ineffective implementation by government. Financial conditions may be difficult for South Africa in the years ahead with consumer spending also anticipated to be muted. The pandemic remains a key focus with state funds allocated to the purchase and distribution of vaccines.

Looking forward, growth expectations for the local economy seem to be dependent on global growth, improving confidence, positive local government action, and Covid-19 containment measures. There have begun some positive surprises in the economy which have been welcomed. Astute stock picking with our Growth at Reasonable Price (GARP) philosophy that delivers superior value through the cycle and a focus on companies whose cash flows support earnings is expected to stand us in good stead moving forward.

## Disclaimer

Collective Investment Schemes in Securities (CIS) should be considered as medium to long-term investments. The value may go up as well as down and past performance is not necessarily a guide to future performance. CIS's are traded at the ruling price and can engage in scrip lending and borrowing. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. A schedule of fees, charges and maximum commissions is available on request from the Manager. There is no guarantee in respect of capital or returns in a portfolio. A CIS may be closed to new investors in order for it to be managed more efficiently in accordance with its mandate. CIS prices are calculated on a net asset basis, which is the total value of all the assets in the portfolio including any income accruals and less any permissible deductions (brokerage, STT, VAT, auditor's fees, bank charges, trustee and custodian fees and the annual management fee) from the portfolio divided by the number of participatory interests (units) in issue. Forward pricing is used. The Fund's Total Expense Ratio (TER) reflects the percentage of the average Net Asset Value (NAV) of the portfolio that was incurred as charges, levies and fees related to the management of the portfolio. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER cannot be regarded as an indication of future TER's. During the phase in period TER's do not include information gathered over a full year. Transaction Costs (TC) is the percentage of the value of the Fund incurred as costs relating to the buying and selling of the Fund's underlying assets. Transaction costs are a necessary cost in administering the Fund and impacts Fund returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Fund, investment decisions of the investment manager and the TER.

Where a current yield has been included for Funds that derive its income primarily from interest bearing income, the yield is a weighted average yield of all underlying interest bearing instruments as at the last day of the month. This yield is subject to change as market rates and underlying investments change.

The Manager retains full legal responsibility for any third-party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks; and potential limitations on the availability of market information. The investor acknowledges the inherent risk associated with the selected investments and that there are no guarantees. Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the fund. Prices are published daily and are available on the Prescient website.

Performance has been calculated using net NAV to NAV numbers with income reinvested. The performance for each period shown reflects the return for investors who have been fully invested for that period. Individual investor performance may differ as a result of initial fees, the actual investment date, the date of reinvestments and dividend *withholding* tax. Full performance calculations are available from the manager on request.
